Wellsite equipment includes a plurality of tools used in oil and gas wells and wellbores, such as wellbore casings, tubing, valves, tools,

sensors, measuring instruments, workovers, intervention tools, etc. Wellsite equipment is often located within a wellbore and/or inside of casings, tubing, or other metal, polymer, or composite materials. The wellsite equipment is also often subjected to harsh environmental conditions, such as high temperature, pressure, and radiation. Wellsite equipment is often susceptible to attacks by hostile persons (e.g., unauthorized entry), animals (e.g., longhorns or ranch bulls), and/or chemicals (e.g., gasoline). The hostile persons, animals, and/or chemicals may damage the wellsite equipment or cause the wellsite equipment to malfunction, fail, or be otherwise damaged. Wellsite equipment may also be damaged by corrosion c6a93da74d
